```
    windows.timerscanner.TimerScanner
                        Print kernel timers and associated module DPCs
    windows.truecrypt.Passphrase
                        TrueCrypt Cached Passphrase Finder
    windows.unloadedmodules.UnloadedModules
                        Lists the unloaded kernel modules.
    windows.vadinfo.VadInfo
                        Lists process memory ranges.
    windows.vadregexscan.VadRegExScan
                        Scans all virtual memory areas for tasks using RegEx.
    windows.vadwalk.VadWalk
                        Walk the VAD tree.
    windows.virtmap.VirtMap
                        Lists virtual mapped sections.
    windows.windows.Windows
                        Enumerates the Windows of Desktop instances
    windows.windowstations.WindowStations
                        Scans for top level Windows Stations

        A file was provided to create this layer (by -f, --single-location or by config)
        The file exists and is readable
        The file is a valid memory image and was acquired cleanly

A symbol table requirement was not fulfilled.  Please verify that:
        The associated translation layer requirement was fulfilled
        You have the correct symbol file for the requirement
        The symbol file is under the correct directory or zip file
        The symbol file is named appropriately or contains the correct banner

Unable to validate the plugin requirements: ['plugins.Info.kernel.layer_name', 'plugins.Info.kernel.symbol_table_name']
